

# Acknowledgments

---

**CMV 2006**

As with any conference there are a number of people to thank and acknowledge. We are very grateful to Harri Siirtola and Tomi Heimonen, both at Tampere Unit for Computer-Human Interaction (TAUCHI), University of Tampere, for developing the website. We are also grateful to the Computing Laboratory at the University of Kent for hosting the website and Mark Wheadon for his technical help with the conference management tool. We also would like to thank Peter Rodgers and Nadia Boukhelifa for their hard work and commitment to this conference. In particular, we thank the Engineering and Physical Sciences Research Council (EPSRC) for funding the “Coordinated Views in Exploratory Visualization” project (<http://www.cvev.org>), which supported Nadia Boukhelifa and thus made it possible to organise this conference. We would also like to acknowledge both Ebad Banissi and Anita D’Pour of GraphicsLink for their assistance in making this conference a reality. Finally, we would like to thank all of the reviewers for their conscientious, discerning, and timely reviews, and all those researchers who submitted a paper to this conference, without which the conference would not be possible.

**Gennady Andrienko**

**Jonathan C. Roberts**
