

IEEE TRANSACTIONS ON MAGNETICS

A PUBLICATION OF THE IEEE MAGNETICS SOCIETY

MARCH 2002

VOLUME 38

NUMBER 2

IEMGAQ

(ISSN 0018-9464)

PART I OF TWO PARTS

SELECTED PAPERS FROM THE 13TH ANNUAL CONFERENCE ON THE COMPUTATION OF ELECTROMAGNETIC FIELDS (COMPUMAG '01) Evian, France, July 2-5, 2001

(See Part I, p. 309, for COMPUMAG '01 Table of Contents. COMPUMAG '01 papers begin on p. 321. See Part II, p. 1326, for Regular Papers.)

Message From the COMPUMAG '01 Conference Chairman	A. Nicolas	318
Message From the COMPUMAG '01 Editorial Board Chairman	G. Molinari	319
Editorial Board		320

PAPERS

Recent Advancement of Electromagnetic Nondestructive Inspection Technology in Japan	K. Miya	321
A New Time-Domain Approach to the Analysis of Scattering Problems.	I. D. Mayergoyz, P. Andrei, and B. Hakim	327
<i>Numerical Techniques</i>		
Finite Formulation of Electromagnetic Field	E. Tonti	333
New Block ILU Preconditioner Scheme for Numerical Analysis of Very Large Electromagnetic Problems		
.	A. Heldring, J. M. Rius, and L. Ligthart	337
Generating Whitney Forms of Polynomial Degree One and Higher	A. Bossavit	341
Combined Direct-Iterative Matrix Solvers for Hierarchical Vector Finite Elements	J. P. Webb	345
Gaussian Basis Representation FIR Filtering for the Numerical Differentiation of Laplacian FE Solutions		
.	G. Capizzi, S. Coco, and A. Laudani	349
Irregular Vector Triangles and Tetrahedra for Finite-Element Analysis in Electromagnetics	S. McFee and D. Ma	353
High-Resolution Human Anatomy Models for Advanced Electromagnetic Field Computations		
.	E. Gjonaj, M. Bartsch, M. Clemens, S. Schupp, and T. Weiland	357
3-D Finite-Element Analysis of Dynamic Characteristics of Twin-Type Electromagnetic Relay		
.	T. Yamaguchi, Y. Kawase, H. Shiimoto, and K. Hirata	361
Application of Optimally Distorted Finite Elements for Field Calculation Problems of Electromagnetism		
.	S. Gyimóthy, A. Vágvölgyi, and I. Sebestyén	365
A Fast Solver for FEM Analyses Using the Parallelized Algebraic Multigrid Method		
.	T. Mifune, T. Iwashita, and M. Shimasaki	369
A Mixed B -Oriented FEM for Magnetostatics in Unbounded Domains	B. Bandelier and F. Rioux-Damidou	373
Mesh Improvement in 2-D Eddy-Current Problems	S. Dufour, G. Vinsard, B. Laporte, and R. Moretti	377

(Contents Continued on Page 310)

Numerical Solution of Maxwell's Equations by Wavelets on the Interval and Equivalence Theorem.	381
..... S. Barmada, A. Musolino, M. Raugi, and R. Rizzo	
Hybrid Finite-Element–Modal-Expansion Method for Matched Magic T-Junction	385
..... Z. Shen, C. L. Law, and C. Qian	
Magnetic Field Simulation Using Conformal FIT Formulations.	389
..... M. Clemens and T. Weiland	
Magnetostatic Field Computations Based on the Coupling of Finite-Element and Integral Representation Methods.	393
..... S. Balac and G. Caloz	
Smoothing Operators for Edge Element Multigrid	397
..... B. Weiß and O. Bíró	
Toward Optimal Error Distributions in Adaptive Finite-Element Electromagnetic Analysis for Microelectronic Interconnection Structures	401
..... D. Giannacopoulos	
Efficient Use of the Local Discontinuous Galerkin Method for Meshes Sliding on a Circular Boundary	405
..... P. Alotto, A. Bertoni, I. Perugia, and D. Schötzau	
A New Whitney-Based Material Operator for the Finite-Integration Technique on Triangular Grids.	409
..... R. Schuhmann, P. Schmidt, and T. Weiland	
An Algebraic Multilevel Preconditioner for Field-Circuit Coupled Problems	413
..... D. Lahaye, S. Vandewalle, and K. Hameyer	
Automatic Hexahedral Mesh Generation for FEM Using Shape Recognition Technique and Tree Method	417
..... S. Nagakura, S. Noguchi, H. Yamashita, and V. Cingoski	
The Adaptive Cross-Approximation Technique for the 3-D Boundary-Element Method	421
..... S. Kurz, O. Rain, and S. Rjasanow	
A New Universal Numerical Technique for the Solution of Boundary Integral Equations	425
..... I. D. Mayergoyz	
Algebraic Multicolor Ordering for Parallelized ICCG Solver in Finite-Element Analyses	429
..... T. Iwashita and M. Shimasaki	
3-D Magnetic Field Analysis Using Nonconforming Mesh With Edge Elements.	433
..... K. Muramatsu, Y. Yokoyama, and N. Takahashi	
Vector Potential Expanded by Edge Basis Functions Associated with Loops on Finite-Element Facets	437
..... I. Tičar, O. Bíró, and K. Preis	
An Effective Method to Reduce the Computing Time of Nonlinear Time-Stepping Finite-Element Magnetic Field Computation	441
..... W. N. Fu, S. L. Ho, H. L. Li, and H. C. Wong	
Eigenvalue Computation by Means of a Tree–Cotree Filtering Technique	445
..... B. Trapp, I. Munteanu, R. Schuhmann, T. Weiland, and D. Ioan	
Eddy-Current Computations Using Adaptive Grids and Edge Elements	449
..... Y. Liu, A. Bondeson, R. Bergström, C. Johnson, M. G. Larson, and K. Samuelsson	
A New Solution Technique for Open Nonlinear Magnetostatic Problems	453
..... J. Lobry	
The Implications of Second-Order Functional Derivative Convergence for Adaptive Finite-Element Electromagnetics	457
..... S. McFee and D. Giannacopoulos	
<i>Static Fields</i>	
Preconditioned Fast Adaptive Multipole Boundary-Element Method	461
..... A. Buchau and W. M. Rucker	
Application of the Domain-Integrated Field Relations Method to the Solution of Large Scale Static and Stationary Magnetic Field Problems.	465
..... I. E. Lager and G. Mur	
Asymptotic Boundary Conditions for Open Boundaries of Axisymmetric Magnetostatic Finite-Element Models	469
..... S. Gratkowski, L. Pichon, and H. Gajan	
Diagnosis of Breaks in Substation's Grounding Grid by Using the Electromagnetic Method	473
..... B. Zhang, Z. Zhao, X. Cui, and L. Li	
Algebraic Multigrid Methods for Magnetostatic Field Problems	477
..... S. Reitzinger and M. Kaltenbacher	
Model With Source Terms in the Constitutive Relationship.	481
..... S. Clénet	
Transient Approach to Steady State of Discharge Phenomena in Corona Device.	485
..... W.-G. Min, S.-H. Lee, H.-S. Kim, and S.-Y. Hahn	
Modeling Magnetization Using Whitney Facet Elements	489
..... A. M. Vishnevsky, A. G. Kalimov, and A. A. Lapovok	
Mathematical Tools for Electromagnetic Modeling Under Realistic Assumptions.	493
..... P. Fernandes	
New Expressions for Calculating the Magnetic Field Created by Radial Current in Massive Disks.	497
..... S. Babic, C. Akyel, S. J. Salon, and S. Kincic	
Optimization of Perfectly Matched Layer for Laplace's Equation	501
..... L. Dedek, J. Dedkova, and J. Valsa	
Novel Technique for Current Density Distribution Analysis of Solidly Modeled Coil	505
..... C.-H. Im, H.-K. Kim, and H.-K. Jung	

A Straightforward Way to Reduce a Locally Nonhomogeneous Field Problem to a Homogeneous One	509
. <i>M. Cehan-Racovita</i>	
Appropriate Finite-Element Formulations for 3-D Electromagnetic-Field Problems	513
. <i>M. Kaltenbacher and S. Reitzinger</i>	
New Methods for a Fast and Easy Computation of Stray Fields Created by Wound Rods	
. <i>O. Chadebec, L.-L. Rouve, and J.-L. Coulomb</i>	517
<i>Quasi-Static Fields</i>	
Harmonic-Balance Finite-Element Modeling of Electromagnetic Devices: A Novel Approach	
. <i>J. Gyselinck, P. Dular, C. Geuzaine, and W. Legros</i>	521
Generalization of the Spanning-Tree Technique	525
. <i>S. Suuriniemi, T. Tarhasaari, and L. Kettunen</i>	
Fast Computational Methods for Large-Scale Eddy-Current Computation	
. <i>G. Rubinacci, A. Tamburrino, S. Ventre, and F. Villone</i>	529
A Multiconductor Model for Finite-Element Eddy-Current Simulation	533
. <i>H. De Gersem and K. Hameyer</i>	
A Comparison of Finite-Element Models for 3-D Rotating Conductors	537
. <i>D. Rodger, H. C. Lai, and P. J. Leonard</i>	
New Iterative Method for Three-Dimensional Eddy-Current Problems	541
. <i>H. Lin, S.-L. Ho, E. K.-W. Cheng, and S. Y. Yang</i>	
Skin Effect Considerations on Transient Electrical Stresses in Composite Structures Affected by Electrostatic Discharge	
. <i>C. Buccella</i>	545
Time-Periodic Finite-Element Method for Hysteretic Eddy-Current Analysis	549
. <i>T. Matsuo and M. Shimasaki</i>	
3-D Computation of Magnetic Anomaly Due to a Rotating Plate in the Earth's Magnetic Field	
. <i>Y. Le Floch, C. Guérin, X. Brunotte, and G. Meunier</i>	553
\mathbf{T} - Ω Formulation for Eddy-Current Problems in Multiply Connected Regions	557
. <i>Z. Ren</i>	
Finite Formulation for the Solution of a 2-D Eddy-Current Problem	561
. <i>F. Bellina, P. Bettini, E. Tonti, and F. Trevisan</i>	
On Convergence of ICCG Applied to Finite-Element Equation for Quasi-Static Fields	565
. <i>H. Igarashi and T. Honma</i>	
Regularization of Eddy-Current Formulations Using Discrete Grad-Div Operators	569
. <i>M. Clemens and T. Weiland</i>	
Improvement of Nonlinear Impedance Boundary Conditions	573
. <i>A. Kost, J. P. A. Bastos, K. Miethner, and L. Jänicke</i>	
Extended Born Domain Integral Models of Diffusive Fields	577
. <i>D. D. Reis, M. Lambert, and D. Lesselier</i>	
Circuits/Fields Coupling and Multiply Connected Domains in Integral Formulations	
. <i>G. Rubinacci, A. Tamburrino, and F. Villone</i>	581
Magnetic Field Dependence of Nonlinear Surface Impedance: Which Field to Choose?	585
. <i>B. Paya and C. Guérin</i>	
Improved Wide-Angle Finite-Difference Beam Propagation Method for the Analysis of Nonlinear Optical Waveguides	
. <i>R. S. Flamino, A. C. César, and B.-H. V. Borges</i>	589
Application of the FDTD for the Optimization of Broad-Band Transitions Between Different Types of Transmission Lines	
. <i>E. Reiche and F. H. Uhlmann</i>	593
Three-Dimensional Steady-State Eddy-Current Analysis of Moving Conductor Using Edge Elements and Moving-Coordinate System	597
. <i>K. Muramatsu, N. Takahashi, N. Iwao, M. Ogawa, and T. Kuwahara</i>	
Numerical Analysis of a Magnetic Recording Write Head Benchmark Problem Using the Finite Integration Technique	601
. <i>M. Clemens, S. Drobny, and T. Weiland</i>	
3-D Transient Eddy-Current Simulations Using FI ² TD Schemes With Variable Time-Step Selection	605
. <i>M. Clemens, M. Wilke, and T. Weiland</i>	
Time-Transient Dynamic Analysis of a Rotational Test-Rig Benchmark Problem	
. <i>H. C. Lai, P. C. Coles, E. Melgoza, D. Rodger, P. J. Leonard, and R. J. Hill-Cottingham</i>	609
Eddy-Current Calculations in Three-Dimensional Moving Structures	613
. <i>F. Rapetti, Y. Maday, F. Bouillault, and A. Razek</i>	
Comparison of Three Formulations for Eddy-Current and Skin Effect Problems	
. <i>R. Jafari-Shapoorabadi, A. Konrad, and A. N. Sinclair</i>	617
The Finite-Difference Time-Domain Technique With Perfectly Matched Layers for Transient Nonlinear Eddy-Current Problems	621
. <i>T. V. Yioultsis, K. S. Charitou, and C. S. Antonopoulos</i>	
Finite-Element Method Adapted to AC Problems	625
. <i>A. Simon, J. L. Corbier, Y. Du Terrail Couvat, and A. Gagnoud</i>	
Numerical Model for Eddy-Current Testing of Ferromagnetic Steel Parts	629
. <i>D. Ioan and M. Rebican</i>	
Spatially Dependent Global Quantities Associated With 2-D and 3-D Magnetic Vector Potential Formulations for Foil Winding Modeling	633
. <i>P. Dular and C. Geuzaine</i>	
<i>Wave Propagation</i>	
Automating Multipoint Galerkin AWE for a FEM Fast Frequency Sweep	637
. <i>R. D. Slone, J.-F. Lee, and R. Lee</i>	
Plane Wave Scattering From Frequency-Selective Surfaces by the Finite-Element Method	
. <i>I. Bardi, R. Remski, D. Perry, and Z. Cendes</i>	641

A Systematic Conformal Finite-Difference Time-Domain (FDTD) Technique for the Simulation of Arbitrarily Curved Interfaces Between Dielectrics	<i>T. I. Kosmanis and T. D. Tsiboukis</i>	645
Method of Overlapping Patches for Electromagnetic Computation Near Imperfectly Conducting Cusps and Edges.	<i>L. Proekt, S. Yuferev, I. Tsukerman, and N. Ida</i>	649
Counterexamples to the Currently Accepted Explanation for Spurious Modes and Necessary and Sufficient Conditions to Avoid Them.	<i>P. Fernandes and M. Raffetto</i>	653
Absorbing Boundary Conditions and Perfectly Matched Layers—An Analytic Time-Domain Performance Analysis.	<i>A. T. de Hoop, P. M. van den Berg, and R. F. Remis</i>	657
The Phase Velocity Error and Stability Condition of the Three-Dimensional Nonstandard FDTD Method	<i>T. Kashiwa, H. Kudo, Y. Sendo, T. Ohtani, and Y. Kanai</i>	661
Stability of Symplectic Finite-Difference Time-Domain Methods	<i>I. Saitoh and N. Takahashi</i>	665
The Prolate and Oblate Spheroid Perfectly Matched Layers	<i>Y. Xiao and Y. Lu</i>	669
Two-Step Lanczos Algorithm for Model Order Reduction.	<i>T. Wittig, I. Munteanu, R. Schuhmann, and T. Weiland</i>	673
FDTD Method With Oblique Incidence for Ionospheric Wave Propagation Problems—Application to an HF One-Hop Radio-Link Study.	<i>T. D. Xenos and T. V. Yioultsis</i>	677
Toward a Simulation of an Optically Controlled Microwave Microstrip Line at 10 GHz	<i>J.-D. Arnoult, A. Vilcot, and G. Meunier</i>	681
Integral Equation Boundary Conditions for the Efficient FDTD Analysis of Low-Frequency Transient Problems	<i>M. S. Sarto and A. Scarlatti</i>	685
Design Study of Ultrahigh-Speed Microwave Simulator Engine	<i>H. Kawaguchi, K. Takahara, and D. Yamauchi</i>	689
Normalized Site Attenuation Standard Correction From Numerical Computing	<i>A. Askri, C. Vollaire, L. Nicolas, and D. Prebet</i>	693
Gaussian Beam Expansion for Radiation Analysis of Metallic Reflectors Illuminated Under Oblique Incidence	<i>J. Sokoloff, S. Bolioli, and P. F. Combes</i>	697
FDTD Analysis of Dielectric-Embedded Electronically Switched Multiple-Beam (DE-ESMB) Antenna Array.	<i>J. Lu, D. Thiel, and S. Saario</i>	701
FDTD Analysis of Microwave Circuits Using Edge Condition	<i>T. Kashiwa, M. Uchiya, K. Suzuki, and Y. Kanai</i>	705
An Efficient Finite-Element Time-Domain Method for the Analysis of the Coupling Between Wave and Shielded Enclosure	<i>S. Benhassine, L. Pichon, and W. Tabbara</i>	709
A New Generalized Perfectly Matched Layer for Terminating 3-D Lossy Media.	<i>L. Ling, L. Ronglin, X. Suming, and N. Guangzheng</i>	713
Implicit Yee-Like Scheme on Tetrahedral Mesh	<i>J. Keränen, J. Kangas, A. Ahola, and L. Kettunen</i>	717
Application of the Multilevel Matrix Decomposition Algorithm to the Frequency Analysis of Large Microstrip Antenna Arrays.	<i>J. Parrón, J. M. Rius, and J. R. Mosig</i>	721
A Fast-Wavelet Solution of Electromagnetic Scattering by Dielectric Bodies of Revolution.	<i>I. R. Ciric and W. Quan</i>	725
FE Analysis of a Low-Frequency Microstrip Antenna.	<i>R. Araneo and S. Celozzi</i>	729
Application of Anisotropic PML in Mode-Matching Analysis of Open-Ended Waveguides	<i>Z. Shen, C. L. Law, and R. H. MacPhie</i>	733
A Nonstandard Higher Order FDTD Algorithm for 3-D Arbitrarily and Fractal-Shaped Antenna Structures on General Curvilinear Lattices	<i>N. V. Kantartzis, T. T. Zygiridis, and T. D. Tsiboukis</i>	737
Method of Overlapping Patches for Electromagnetic Computation	<i>L. Proekt and I. Tsukerman</i>	741
A Numerical Approach for the Determination of the Tissue Equivalent Liquid Used During SAR Assessments	<i>V. Monebhurrin, C. Dale, J.-Ch. Bolomey, and J. Wiart</i>	745
Stable Time-Domain Boundary Integral Equation Method for Axisymmetric Coupled Charge-Electromagnetic Field Problems.	<i>H. Kawaguchi</i>	749
Implementation of the Boundary Integral Method for Electromagnetic Scattering Problems With Geometrical Discontinuities.	<i>T. Jacques, L. Nicolas, and C. Vollaire</i>	753
<i>Electromagnetic Compatibility</i>		
Constrained Decision Planning Applied to Field Profile Optimization in LPS of Structures Directly Struck by Lightning	<i>C. A. F. Sartori, J. R. Cardoso, C. C. B. Oliveira, A. Orlandi, and G. Antonini</i>	757
Full-Wave Analysis of Shielded Cable Configurations by the FDTD Method	<i>M. Feliziani and F. Maradei</i>	761
Efficient Modeling of Discontinuities and Dispersive Media in Printed Transmission Lines.	<i>R. Araneo, C. Wang, X. Gu, J. Drewniak, and S. Celozzi</i>	765
Evaluation of the Field Coupling to a Line of Finite Length—A Comparison Between the Dual Integral Equation Approach and the Moment Method.	<i>F. Delfino, R. Procopio, P. Girdinio, A. Andreotti, and L. Verolino</i>	769

Time-Domain Analysis of Transient Electromagnetic Field Generated by Aerial Busbars Above Lossy Soil	773
. <i>T. Lu, X. Cui, H. Yin, and L. Li</i>	
A Comparative Study of the Biological Effects of Various Mobile Phone and Wireless LAN Antennas	777
. <i>T. V. Yioultsis, T. I. Kosmanis, E. P. Kosmidou, T. T. Zygiridis, N. V. Kantartzis, T. D. Xenos, and T. D. Tsiboukis</i>	
Proximity Effect and Magnetic Field Calculation in GIL and in Isolated Phase Bus Ducts	781
. <i>R. Benato, F. Dughiero, M. Forzan, and A. Paolucci</i>	
Neural Characterization of Wire Bundles Multiconductor Transmission Lines	785
. <i>B. Cannas, A. Fanni, and F. Maradei</i>	
Efficient Post-Processing Procedure for Combined FDTD/TL Transient Analyses	789
. <i>M. S. Sarto</i>	
Electromagnetic Fields Radiated by a Cellular Phone in Close Proximity to Metallic Walls	793
. <i>H. Domínguez, A. Raizer, and W. P. Carpes, Jr.</i>	
<i>Material Modeling</i>	
An Inverse Jiles–Atherton Model to Take Into Account Hysteresis in Time-Stepping Finite-Element Calculations	797
. <i>N. Sadowski, N. J. Batistela, J. P. A. Bastos, and M. Lajoie-Mazenc</i>	
Optimum Design Rule of Hysteresis Loop for Ultrahigh Density Recording in Single-Layered Perpendicular Media	801
. <i>K. J. Lee, Y. H. Im, N. Y. Park, and T. D. Lee</i>	
Iron Losses in Electrical Machines: Influence of Different Material Models	805
. <i>O. Bottauscio, A. Canova, M. Chiampi, and M. Repetto</i>	
Circuit Network Analog for ESD Current Strikes Composite Structures	809
. <i>C. Buccella</i>	
Numerical Evaluation of the Influence of Anisotropy on the Eddy Currents in Laminated Ferromagnetic Alloys.	813
. <i>L. R. Dupré, R. Van Keer, and J. A. A. Melkebeek</i>	
Analysis of Shielding Performance in Nonlinear Media	817
. <i>F. Bertoncini, E. Cardelli, S. Di Fraia, and B. Tellini</i>	
Dynamic Modeling of Liquid Crystal Display Cells Using a Constant Charge Approach	821
. <i>F. A. Fernández, H. Deng, and S. E. Day</i>	
Magnetic Field Calculations Including the Impact of Persistent Currents in Superconducting Filaments	825
. <i>M. Aleksa, S. Russenschuck, and C. Völlinger</i>	
A Study of Characteristic Analysis of the Three-Phase Transformer With Step-Lap Wound-Core.	829
. <i>A. Mae, K. Harada, Y. Ishihara, and T. Todaka</i>	
Identification Procedures of Preisach Model	833
. <i>O. Henze and W. M. Rucker</i>	
Implementation of the Simplified Vector Model	837
. <i>A. Reimers and E. Della Torre</i>	
Analysis of a Magnetic Frequency Tripler Using the Preisach Model	841
. <i>T. Ishikawa and Y. Hou</i>	
Two-Dimensional Analysis of Composite Structures by the Finite-Difference Time-Domain Method Adopting Scaling Approach.	845
. <i>C. Buccella</i>	
Comparison of Numerical Methods for Modeling of Superconductors	849
. <i>S. Stavrev, F. Grilli, B. Dutoit, N. Nibbio, E. Vinot, I. Klutsch, G. Meunier, P. Tixador, Y. Yang, and E. Martinez</i>	
High Performance Method for Determination of Shielding Current Density in HTS Plate	853
. <i>A. Kamitani, K. Hasegawa, and T. Yokono</i>	
A New Neural-Network-Based Scalar Hysteresis Model	857
. <i>M. Kuczmann and A. Iványi</i>	
A New Modeling of the Vector Magnetic Property	861
. <i>H. Shimoji, M. Enokizono, T. Todaka, and T. Honda</i>	
Monte Carlo Simulation for Magnetic Materials Including Dislocations.	865
. <i>K. Yamaguchi, K. Yamada, and T. Takagi</i>	
Fast Computation of the CMH Model	869
. <i>U. D. Patel and E. Della Torre</i>	
Genetic Algorithms and Neural Networks Generalizing the Jiles–Atherton Model of Static Hysteresis for Dynamic Loops	873
. <i>A. Salvini and F. R. Fulginei</i>	
Designing a Low-Loss Induction Motor Considering the Vector Magnetic Properties	877
. <i>M. Enokizono and K. Okamoto</i>	
Improvement of E&S Modeling for Eddy-Current Magnetic Field Analysis	881
. <i>M. Enokizono and Y. Fujita</i>	
Dynamic Hysteresis Modeling Based on Preisach Model	885
. <i>Y. Bernard, E. Mendes, and F. Bouillault</i>	
A Proposal of Finite-Element Analysis Considering Two-Dimensional Magnetic Properties	889
. <i>K. Fujiwara, T. Adachi, and N. Takahashi</i>	
A Test Case for Validation of Magnetic Field Analysis With Vector Hysteresis.	893
. <i>O. Bottauscio, M. Chiampi, C. Ragusa, L. Rege, and M. Repetto</i>	
Nonlinear Magnetic Field Model by FEM Taking Into Account Hysteresis Characteristics With \mathbf{M} - \mathbf{B} Variables.	897
. <i>P. I. Koltermann, J. P. A. Bastos, N. Sadowski, N. J. Batistela, A. Kost, L. Jänicke, and K. Miethner</i>	
A Generalization of a Piece-Wise Linear Circuit Model of Hysteresis	901
. <i>B. Cannas, S. Cincotti, and I. Daneri</i>	
Derivation of a Complex Permeability From the Preisach Model	905
. <i>K. Hollaus and O. Biró</i>	
Resistive Disturbance Location Influence on Superconducting Winding Quench Performance	909
. <i>P. Surdacki</i>	

Coupled Problems

Magnetic Confinement of Paramagnetic Micro and Nano-Particles Away From Solid Walls *J. Berthier, P. Pham, P. Massé, and D. Massé* 913

Coupled Model of a Magnetic Actuator Controlling a Hydraulic Cylinder and Load . . . *J. R. Brauer and J. H. Lumkes, Jr.* 917

Coupled Finite-Element–Analytic Technique for Prediction of Temperature Rise in Power Apparatus *S. W. Kim, H. H. Kim, S. C. Hahn, B. Y. Lee, K. Y. Park, Y. J. Shin, W. P. Song, J. B. Kim, and I. H. Shin* 921

Calculation of Strongly Coupled Thermal and Electromagnetic Fields in Pulse-Loaded Devices *O. Michelsson, G. Scheinert, and F. H. Uhlmann* 925

Stator Pole and Yoke Design for Vibration Reduction of Switched Reluctance Motor . . . *J.-P. Hong, K.-H. Ha, and J. Lee* 929

A Non-*a priori* Approach to Analyze Electrical Machines Modeled by FEM Connected to Static Converters *A. M. Oliveira, P. Kuo-Peng, N. Sadowski, M. S. de Andrade, and J. P. A. Bastos* 933

Temperature Solver for Highly Nonlinear Ferromagnetic Materials for Thin Moving Sheets in Transversal Flux Induction Heating *C. Monzel and G. Henneberger* 937

The Element-Free Galerkin Method Applied to the Study of Fully Developed Magnetohydrodynamic Duct Flows *S. L. L. Verardi, J. M. Machado, and J. R. Cardoso* 941

Finite-Element Analysis of an Electromechanical Field of a BLDC Motor Considering Speed Control and Mechanical Flexibility *G. H. Jang, J. H. Chang, D. P. Hong, and K. S. Kim* 945

Analysis of Coupled Electric and Thermal Field Problems by Boundary-Element Method. *E. Kurgan* 949

Comparison of Table Models of Electromagnetic Actuators *E. Melgoza and D. Rodger* 953

Determination of the Curvature of the Magnetic Fluid Under the External Forces *G. S. Park and S. H. Park* 957

Analysis of a Permanent Magnet Generator With Dual Formulations Using Periodicity Conditions and Moving Band. *M. V. Ferreira da Luz, P. Dular, N. Sadowski, C. Geuzaine, and J. P. A. Bastos* 961

Circuit-Oriented FEM: Solution of Circuit–Field Coupled Problems by Circuit Equations . . . *M. Feliziani and F. Maradei* 965

Comparison of Induction Machine Stator Vibration Spectra Induced by Reluctance Forces and Magnetostriction *K. Delaere, W. Heylen, R. Belmans, and K. Hameyer* 969

A Dynamic Model of the Disk Drive Spindle Motor and Its Applications *W. N. Fu, Z. J. Liu, and C. Bi* 973

Coupled Thermal-Electromagnetic Simulation of a Microwave Curing Cell *L. Pichon and O. Meyer* 977

Parallelization of Coupled Differential and Integral Methods Using Domain Decomposition *V. Rischmüller, S. Kurz, and W. M. Rucker* 981

3-D Simulation of Electrostatic–Mechanical Transducers Using Algebraic Multigrid *M. Kaltenbacher, H. Landes, S. Reitzinger, and R. Peipp* 985

Study of Head Winding Effects in a Switched Reluctance Machine *Y. Sofiane, A. Tounzi, F. Piriou, and M. Liese* 989

Modeling of Magnetoelastic Material *L. Vandeveld and J. A. A. Melkebeek* 993

Optimization and Inverse

Particle Swarm Optimization—Mass-Spring System Analogon *B. Brandstätter and U. Baumgartner* 997

Niching Genetic Algorithm Adopting Restricted Competition Selection Combined With Pattern Search Method *J.-K. Kim, D.-H. Cho, H.-K. Jung, and C.-G. Lee* 1001

Recent Improvements for Solving Inverse Magnetostatic Problem Applied to Thin Shells *O. Chadebec, J.-L. Coulomb, J.-P. Bongiraud, G. Cauffet, and P. Le Thiec* 1005

Inverse Analyses for Natural and Multicracks Using Signals From a Differential Transmit–Receive ECT Probe *H. Huang and T. Takagi* 1009

A Tabu Method to Find the Pareto Solutions of Multiobjective Optimal Design Problems in Electromagnetics *S. L. Ho, S. Yang, G. Ni, and H. C. Wong* 1013

Adaptive Finite-Element Mesh Generation for Optimization Problems. *B. Brandstätter, A. Decker, and W. Ring* 1017

Effective Optimal Design of 3-D Magnetic Device Having Complicated Coil Using Edge Element and Biot–Savart Method *T. Ohnishi and N. Takahashi* 1021

Reconstruction of Crack Shapes From the MFLT Signals by Using a Rapid Forward Solver and an Optimization Approach *Z. Chen, G. Preda, O. Mihalache, and K. Miya* 1025

Topology Optimization of Nonlinear Magnetostatics *S. Wang and J. Kang* 1029

Integrated RBF Network Based Estimation Strategy of the Output Characteristics of Brushless DC Motors *S. L. Ho, M. Fei, W. N. Fu, H. C. Wong, and E. W. C. Lo* 1033

Use of Intelligent-Particle Swarm Optimization in Electromagnetics *G. Ciuprina, D. Ioan, and I. Munteanu* 1037

Evolution Strategy and Hierarchical Clustering *O. Aichholzer, F. Aurenhammer, B. Brandstätter, T. Ebner, H. Krasser, Ch. Magele, M. Mühlmann, and W. Renhart* 1041

Dependence of the Inverse Solution Accuracy in Magnetocardiography on the Boundary-Element Discretization	1045
..... <i>J. Hauelsen, J. Schreiber, H. Brauer, and T. R. Knösche</i>	
Magnetic Material Model Characterization and Optimization Software	1049
..... <i>P. R. Wilson, J. N. Ross, and A. D. Brown</i>	
Topology Optimization of Electrostatic Actuator Using Design Sensitivity	1053
..... <i>J. Byun, I. Park, and S. Hahn</i>	
Optimal Magnetic Probes Location for Current Reconstruction in Multistrands Superconducting Cables	1057
..... <i>P. Bruzzone, A. Formisano, and R. Martone</i>	
Neural-Network-Based Inverse-Scattering Technique for Online Microwave Medical Imaging	1061
D-Optimal Experimental Design Applied to a Linear Magnetostatic Inverse Problem	1065
..... <i>S. Bégot, E. Voisin, P. Hiebel, E. Artioukhine, and J. M. Kauffmann</i>	
An Improved Tabu Algorithm Applied to Global Optimizations of Inverse Problems in Electromagnetics	1069
..... <i>C. Xudong, N. Guangzheng, and Y. Shiyong</i>	
Direct Computation of Static Difference Magnetic Field in Nonlinear Magnetic Materials and Application to Shape Reconstruction of Damaged Areas in Aging Materials	1073
..... <i>B. Cranganu-Cretu, F. I. Hantila, G. Preda, Z. Chen, and K. Miya</i>	
Optimization of the Coil Shape in Deflection Yoke Considering Practical Coil Winding Processes	1077
..... <i>C.-H. Im, H.-K. Kim, and H.-K. Jung</i>	
An Improved Method Using Radial Basis Function Neural Networks to Speed Up Optimization Algorithms	1081
..... <i>M. Bazan, M. Aleksa, and S. Russenschuck</i>	
Diffuse-Element Method and Quadrees: Two “Ingredients” for an Adaptive Response Surface	1085
..... <i>M. C. Costa, J.-L. Coulomb, Y. Maréchal, Á. B. Dietrich, and S. I. Nabeta</i>	
An Approach to the Plasma Magnetic Contour Identification in Presence of Eddy Currents	1089
..... <i>P. Bettini, F. Trevisan, and A. Formisano</i>	
Optimization of Unconventional P.M. Couplings	1093
..... <i>J. F. Charpentier and G. Lemarquand</i>	
<i>Software Methodology</i>	
A Finite-Element 3-D Magnetostatic Solver Using STEP Data	1097
..... <i>S. Ma, Y. Maréchal, and J.-L. Coulomb</i>	
Object-Oriented Software for Advanced Characterization of Magnetic Materials	1101
..... <i>V. Ionita, B. Cranganu-Cretu, and A. Ionita</i>	
Accelerating the Computer-Based Simulation and Design of Electromagnetic Devices by Applying Knowledge	1105
..... <i>D. A. Lowther</i>	
Design Sensitivity of Frequency Response in 3-D Finite-Element Analysis of Microwave Devices	1109
..... <i>J. P. Webb</i>	
Fast Reconstruction of Beams in Intense Proton Accelerators	1113
..... <i>B. Brandstätter</i>	
Inverse Scattering in the Time Domain: An Iterative Method Using an FDTD Sensitivity Analysis Scheme	1117
..... <i>I. T. Rekanos</i>	
Optimal Design of a Coil Arrangement for the Identification of Hidden Ferrous Objects	1121
..... <i>W. Renhart and C. Magele</i>	
Derivation of a General Sensitivity Formula for Shape Optimization of 2-D Magnetostatic Systems by Continuum Approach	1125
..... <i>D.-H. Kim, S.-H. Lee, I.-H. Park, and J.-H. Lee</i>	
Shape Optimization of High T_c Superconducting Magnets	1129
..... <i>V. Cavaliere, M. Cioffi, A. Formisano, and R. Martone</i>	
Multiobjective Genetic Algorithms Applied to Solve Optimization Problems	1133
..... <i>A. H. F. Dias and J. A. de Vasconcelos</i>	
An Iterative Approach for the 3-D Representation of Focusing Axisymmetric Magnetic Fields in TWT Collectors	1137
..... <i>S. Coco and A. Laudani</i>	
Robust Design for Torque Optimization Using Response Surface Methodology	1141
..... <i>X. K. Gao, T. S. Low, Z. J. Liu, and S. X. Chen</i>	
<i>Devices and Applications</i>	
Analysis of Magnetizing Process Using Discharge Current of Capacitor by 3-D Finite-Element Method	1145
..... <i>Y. Kawase, T. Yamaguchi, N. Mimura, M. Igata, and K. Ida</i>	
Microwave and Thermal Analysis of a High-Power Ferrite Phase Shifter	1149
..... <i>B. M. Dillon and A. A. P. Gibson</i>	
Simulation of Forces and 3-D Field Arising During Power Autotransformer Fault Due to Electric Arc in HV Winding	1153
..... <i>K. Zakrzewski, B. Tomczuk, and D. Koterak</i>	
Detent Force Minimization Techniques in Permanent Magnet Linear Synchronous Motors	1157
..... <i>K.-C. Lim, J.-K. Woo, G.-H. Kang, J.-P. Hong, and G.-T. Kim</i>	
3-D Finite-Element Analysis of Eddy-Current Evaluation of Curved Plates	1161
..... <i>Y. Le Bihan</i>	
2-D FEM Modeling of the Tubular Linear Induction Motor Taking Into Account the Movement	1165
..... <i>D. Deás, P. Kuo-Peng, N. Sadowski, A. M. Oliveira, J. L. Roel, and J. P. A. Bastos</i>	
Numerical Calculation Method for Pulsed Eddy-Current Testing	1169
..... <i>J. Pávó</i>	

CSC—A Procedure for Coupled S -Parameter Calculations	<i>H.-W. Glock, K. Rothemund, and U. van Rienen</i>	1173
Ferrofluids in Electric Motors—A Numerical Process Model	<i>A. Nethe, T. Scholz, H.-D. Stahlmann, and M. Filtz</i>	1177
2-D Simulation on the Corona Discharge of Negative Needle-to-Plane Electrodes	<i>J. H. Shim, S. K. Choi, H. D. Hwang, D. Y. Ha, K. C. Ko, and H. B. Kang</i>	1181
Magnetic Discretion of Naval Propulsion Machines	<i>B. Froidurot, L.-L. Rouve, A. Foggia, J.-P. Bongiraud, and G. Meunier</i>	1185
Design for Torque Ripple Reduction of a Three-Phase Switched-Reluctance Machine	<i>M. E. Zaïm, K. Dakhouche, and M. Bounekhla</i>	1189
Neural Mesh Iteration for the FE Computation of Charged-Particle Trajectories in Vacuum Electron Devices . . .	<i>S. Coco</i>	1193
Influence of Current Diffusion in Superconducting Magnet Fabricated by High Stabilizer Aluminum on Quench Propagation	<i>Q. Wang, J. He, C. S. Yoon, and K. Kim</i>	1197
Eddy-Current Computation in the Claws of a Synchronous Claw-Pole Alternator in Generator Mode	<i>C. Kaehler and G. Henneberger</i>	1201
Numerical Studies of Reflection Process on a Field-Reversed Configuration Plasma	<i>T. Kanki</i>	1205
3-D Nonlinear Eddy-Current Analysis of Alternating Magnetic Flux Leakage Testing—Analysis of One Crack and Two Cracks	<i>Y. Gotoh and N. Takahashi</i>	1209
Electric-Field Calculation for HV Insulators Using Domain-Decomposition Method	<i>I. Sebestyén</i>	1213
The Effects of the Distribution of Residual Magnetization on the Cogging Torque and Switching Signals in Permanent Magnet (PM) Motors	<i>C. S. Koh, B.-K. Kang, J.-S. Ryu, and J.-S. Seol</i>	1217
Air-Gap Flux Splitting for the Time-Harmonic Finite-Element Simulation of Single-Phase Induction Machines	<i>H. De Gersem and K. Hameyer</i>	1221
Estimation of Eddy-Current Loss in Permanent Magnets of Electric Motors Using Network-Field Coupled Multislice Time-Stepping Finite-Element Method	<i>W. N. Fu and Z. J. Liu</i>	1225
A Fast Code Using Nonmagnetic Measurements for RFX Current and Magnetic Field Profile Reconstruction	<i>D. Desideri, L. Zabeo, M. Bagatin, G. Chitarin, and R. Piovan</i>	1229
The Use of 3-D Electric Field Analysis and the Analytical Approach for Improvement of a Combined Instrument Transformer Insulation System	<i>E. Lesniewska</i>	1233
Simulation of Magnetic Stimulation of the Brain	<i>J. Starzyński, B. Sawicki, S. Wincenciak, A. Krawczyk, and T. Zyss</i>	1237
Nonlinear FEM–BEM Formulation and Model-Free Inversion Procedure for Reconstruction of Cracks Using Pulse Eddy Currents	<i>G. Preda, B. Cranganu-Cretu, F. I. Hantila, O. Mihalache, Z. Chen, and K. Miya</i>	1241
Efficient Finite-Element Computation of Synchronous Machine Transfer Functions	<i>R. Escarela-Perez, E. Campero-Littlewood, and T. Niewierowicz</i>	1245
Harmonic Analysis of Output Voltage in Synchronous Generator Using Finite-Element Method Taking Account of the Movement	<i>C. E. Kim and J. K. Sykulski</i>	1249
Superconducting Coils Quench Simulation, the Wilson’s Method Revisited	<i>V. Picaud, P. Hiebel, and J.-M. Kauffmann</i>	1253
Computation of 3-D Open Boundary Eddy-Current Fields in Large Transformers Using \mathbf{T} , ψ – φ_m Method Coupled With GTM	<i>R. Tang, Y. Hu, Z. Liang, and X. Xie</i>	1257
Modeling of Photonic Crystal Optical Fibers With Finite Elements	<i>S. Guenneau, A. Nicolet, F. Zolla, and S. Lasquellec</i>	1261
Finite-Element Simulation of Time-Dependent Electromagnetic Fields in the End Zone of Superconducting Motors . . .	<i>I. Tsukerman and V. Dombrovski</i>	1265
Computing Methods of Hypersingular Integral Applied to Eddy-Current Testing	<i>Ph. Beltrame and N. Burais</i>	1269
Design of Encircling Remote Field Eddy-Current Probe	<i>Y.-K. Shin</i>	1273
Improvement of the Sensor System in Magnetic Flux Leakage-Type Nondestructive Testing (NDT)	<i>G. S. Park and E. S. Park</i>	1277
An Efficient Procedure to Calculate Equivalent Circuit Parameter of Induction Motor Using 3-D Nonlinear Time-Stepping Finite-Element Method	<i>K. Yamazaki</i>	1281
The Effect of the Stator-Slot Opening on the Interbar Currents of Skewed Cage Induction Motor	<i>R. Carlson, C. A. da Silva, N. Sadowski, Y. Lefèvre, and M. Lajoie-Mazenc</i>	1285
The Space Charge Effect on the Corona Discharge of SF ₆ Gas	<i>S.-K. Choi, D.-Y. Ha, H.-J. Ju, J.-H. Shim, C. Lee, and H.-B. Kang</i>	1289
Analysis of Torque Ripple in a BDCM	<i>H. Zeroug, B. Boukais, and H. Sahraoui</i>	1293
Transient Analysis of a New Outer-Rotor Permanent-Magnet Brushless DC Drive Using Circuit-Field-Torque Coupled Time-Stepping Finite-Element Method	<i>Y. Wang, K. T. Chau, C. C. Chan, and J. Z. Jiang</i>	1297

Dynamic Image Reconstruction in Electrical Impedance Tomography With Known Internal Structures	1301
..... <i>K. Y. Kim, S. I. Kang, M. C. Kim, S. Kim, Y. J. Lee, and M. Vauhkonen</i>	
<i>Education</i>	
Network Equivalent of Nodal and Edge Elements in Electromagnetics	1305
..... <i>A. Demenko and J. K. Sykulski</i>	
Cuts for the Magnetic Scalar Potential in Knotted Geometries and Force-Free Magnetic Fields	1309
..... <i>J. C. Crager and P. R. Kotiuga</i>	
FEA of Electromagnetics: A Geometrical Approach for Problems With Plane Symmetry	1313
..... <i>L. N. Rossi, J. R. Cardoso, V. C. Silva, L. Lebensztajn, and J. A. P. da Silva</i>	
An Electromagnetic Field Analysis Tool in Education	1317
..... <i>K. Preis, O. Bíró, T. Ebner, and I. Tičar</i>	

CONFERENCE AUTHOR INDEX	1321
