## Erratum

## Correction to: "Penetration Depths Inferred from Interferometric Volume Decorrelation Observed over the Greenland Ice Sheet"

In the above paper,<sup>1</sup> Fig. 4 was incorrect. The following is the corrected figure.

Fig. 4. In (a), we plot the measured correlation site A versus baseline, where we have also plotted the curves from our spatial correlation model. The error bars indicate the standard deviation of the correlation. Volume effects are evident in the sharp drop-off of correlation with baseline, leading to a critical baseline that is roughly a fourth of the nominal ERS critical baseline. The number beside each data circle denotes temporal baseline (t) in days. Longer temporal baselines. By estimating and removing the temporal decorrelation in (a), we calculate the residual spatial correlation, shown in (b).
