

You can't find Schenectady in Antarctica.

But on the other six continents, you'll find us. Schenectady Chemicals.

We're a worldwide leader in the chemical products industry. The world's largest producer of high-purity alkylphenols. Pioneers in the science of high-temperature electrical insulation. And experts in specialty binders and resins.

Yet, even with offices and affiliates across the globe, our roots are right here in Schenectady, New York. Where our progressive laboratory facilities

keep us on the leading edge of applied chemistry. And our four domestic plants use the latest technology to meet the most demanding industrial requirements.

That's why, when businesses need the world's highest quality chemical products, they come to Schenectady. No matter which continent they're on.
