

INFORMATION FOR AUTHORS

CONTENT

The IEEE TRANSACTIONS ON SEMICONDUCTOR MANUFACTURING is published quarterly with the first issue in February. Contributed papers may be of a tutorial or research nature, but the latter must be original and must not duplicate descriptions or derivations available elsewhere.

This TRANSACTIONS aims to address the challenging problems of manufacturing complex microelectronic components, especially very large scale integrated circuits (VLSI), but also thin-film heads for magnetic recording, integrated optical components, and other similar products. Manufacturing these products typically requires precision micropatterning, precision control of materials properties, ultra-clean work environments, and complex interactions of chemical, physical, electrical, and mechanical processes. An integrated application of interdisciplinary skills is essential for success.

Particularly sought for these TRANSACTIONS are original papers describing practical engineering techniques for solving problems involving interactions among facility, equipment, process, product, and people issues in the context of manufacturing. The TRANSACTIONS' spectrum of coverage will range from fundamental to applied. Whenever possible papers should include appropriate results from manufacturing experience. Submission of a manuscript manifests the fact that it has been neither copyrighted, published, nor submitted or accepted for publication elsewhere, unless otherwise so stated by the author.

LENGTH

Authors should document their work in relation to the open literature. The following limits on length will be enforced.

- 1) Regular papers, 7 to 20 double-spaced pages in length, plus up to 10 pages of figures (8.5" by 11").
- 2) Correspondence items of less than 6 double-spaced pages, plus not more than 3 pages of figures.

STYLE FOR MANUSCRIPTS

- 1) The manuscript should be printed using double space; use one side of the sheet only. Office-duplicated copies are acceptable.
- 2) Provide a carefully worded abstract of from 100 to 200 words for papers and less than 50 words for correspondence. Name, address, and telephone number of author(s) should appear with abstract.
- 3) For manuscript preparation guidelines, please visit the Preparation of Papers for IEEE TRANSACTIONS AND JOURNALS at the following URL: <http://www.ieee.org/organizations/pubs/transactions/stylesheets.htm>
- 4) References may appear as numbered footnotes or in a separate bibliography at the end of the paper. In either case, references should be complete and in IEEE style.

Style for papers: Author (with initials first), title, journal title, volume number, inclusive page numbers, month, year.

Style for books: Author, title, location, publisher, year, page or chapter number (if desired). See this issue for further examples.

- 5) Figure captions should be on a separate sheet in proper style for typesetting. See this issue for examples.
- 6) Departures from the above style may delay publication.

STYLE FOR ILLUSTRATIONS

- 1) Originals of drawings and glossy print photographs should be sharp and of good contrast. Line drawings should be in high contrast black ink on a white background. Use 8.5" by 11" size sheets to simplify handling of the manuscript. Template lettering is recommended; typing on figures is not acceptable. Lettering must be large enough to permit legible reduction of the figure to column width, perhaps as much as 4:1.
- 2) Identify each illustration on the back or at the bottom of the front with the figure number and name of author(s). Captions lettered on figures will be blocked out in reproduction in favor of typeset captions.
- 3) For more information on submitting electronic graphics, please visit the URL: <http://www.ieee.org/organizations/pubs/transactions/information.htm> and click on the link "Guidelines for Author Supplied Electronic Text and Graphics."

REVIEW PROCESS

The review process usually requires about two months. The author is then notified of the decision of the Editor or Associate Editor based on reviewer recommendations. The authors may be asked to modify the manuscript if it is not accepted or rejected in its original form. The elapsed time between final acceptance of a manuscript and publication is usually four to eight months.

SUBMISSIONS

Send the original and four copies of your manuscript to the Editor. Each copy should be complete with illustrations and should be accompanied by a separate sheet containing the address to which galley proofs and other correspondence can be sent. Also enclose original illustrations or be prepared to submit these immediately upon acceptance of your manuscript. Authors will be charged for changes in text or figures in proof. In the case of regular papers, also be prepared to provide a brief technical biography and photograph of each author.

Electronic Publishing: This form of manuscript handling is available as an option for the accepted letter. At the time of initial submission, the author is requested to submit only the hard copies. Upon final acceptance of the manuscript, the author is encouraged to submit the final version of his manuscript in electronic form on a floppy disk prepared with an acceptable word processor together with an identical paper copy. Figures, photos, etc., must be submitted in a camera ready form but not in an electronic form.

Page Charges: After manuscript has been accepted for publication, the author's company or institution will be requested to pay a charge of \$110.00 per printed page to cover part of the cost of publication. If the page charges are not met, then for any printed paper whose length exceeds eight pages, including illustrations, there will be a mandatory charge of \$175 per page for the additional pages. Payments of page charges (first eight only) for this IEEE TRANSACTIONS, like those for journals of other professional societies, is not obligatory nor is their payment a prerequisite for publication. The author will receive 100 free reprints without covers if the charge is honored. Detailed instructions will accompany the page proofs.

Copyright: It is the policy of the IEEE to own the copyright to the technical contributions it publishes on behalf of the interests of the IEEE, its authors, and their employers, and to facilitate the appropriate reuse of this material by others. To comply with the U.S. Copyright Law, authors are required to sign an IEEE copyright transfer form before publication. This form, a copy of which appears in the February issue of this TRANSACTIONS, returns to authors and their employers full rights to reuse their material for their own purposes. Authors must submit a signed copy of this form with their manuscripts.
