

IMS2011– MicroApps

Rafi Hershtig and Tim Dolan

The Microwave Application and Product Seminars (MicroApps) is an adjunct program to be held in partnership with the Exhibition during the International Microwave Symposium (IMS) 2011 in Baltimore. Micro-

Apps provides a forum for the 400+ exhibitors to give technical presentations focused on their products and/or technologies.

This year the presentations cover new products and technologies, noteworthy state-of-the-art components, as well as novel manufacturing and design techniques. MicroApps runs concurrent with the Exhibition show floor hours and is conveniently located in its own dedicated and curtained-off area within the exhibition floor.

New to MicroApps in 2011 is the introduction of two noteworthy special sessions:

- Emerging Technology Panel: Non-linear measurements. This will be held on Wednesday during the Technical Session lunch break.

Rafi Hershtig (rhershtig@klmicrowave.com) is the chair of MicroApps for IMS2011. Tim Dolan is with K&L Microwave.

Date of publication: 1 April 2011

This MicroApps special session as well as select exhibitor presentations, will be video recorded by IEEE.TV during the week of IMS in Baltimore and made available for viewing on the Web after the conference concludes.

- Industry keynote speaker: This year's keynote speaker will be John Ocampo, chair of M/A-COM Technology Solutions on Wednesday evening during the "open exhibition" reception hour.

The 2011 MicroApps committee is chaired by Rafi Hershtig and Tim Dolan of K&L Microwave. Any questions or comments can be sent to microapps@ims2011.org.

MicroApps 2010 speaker Mark Saffian—solutions architect, AWR Corporation in El Segundo, California.

MicroApps 2010 speaker John Dunn, a senior consulting engineer, AWR Corporation in El Segundo, California.
