

News on Virtual IBIS Summit at IEEE SPI 2021

By Randy Wolff, IBIS Chair

The I/O Buffer Information Specification (IBIS) Open Forum is planning a virtual Summit meeting in coordination with SPI 2021, the 25th IEEE Workshop on Signal and Power Integrity. The virtual meeting will take place from 16:00-20:00 Central European time on Wednesday, May 12, 2021. IBIS Summits provide an opportunity for industry and academia (including students) to make proposals and share their work.

IBIS is pleased to invite Alistair Duffy, IEEE EMC Society President, to discuss the new IEEE Transactions on Signal and Power Integrity. Other presentations are planned on signal and power integrity topics. Presentations are welcome from IEEE SPI attendees, IBIS participants, and others interested in the

IBIS specification, signal integrity, and power integrity.

For more information on the Summit meeting, registration, and submitting presentations, see: <https://ibis.org/events/>. Presentations and minutes from past Summit meetings are archived at: <https://ibis.org/summits/>.

The IBIS Open Forum (under SAE ITC) is the industry organization responsible for the management of the IBIS specifications and standards including IBIS, IBIS-AMI, IBIS-ISS, ICM, and Touchstone. For more information, contact Randy Wolff at rrwolff@micron.com or the EMC Society liaison to IBIS, Zhiping Yang, Technical Advisory Committee Chair, at zhipingyang@waymo.com. **EMC**

IBIS to Meet Virtually at the 2021 IEEE EMC+SIPI Symposium and EMC Europe

Did you know the first time the IBIS Summit was held in conjunction with the IEEE EMC Society's annual symposium was during the 2020 IEEE International Virtual Symposium on Electromagnetic Compatibility, Signal Integrity, and Power Integrity (EMC+SIPI)? Due to the popularity of the IBIS Summit last August, it will be held again this year during the 2021 Joint IEEE International Symposium on Electromagnetic Compatibility, Signal Integrity and Power Integrity, and EMC Europe. Over 60 signal and power integrity engineers attended the IBIS Summit last August; we expect greater attendance this year during the symposium dates of July 27-August 13, 2021. The exact date and time will be announced in the Symposium Advance Program which will be published in the near future. Check the Symposium website for more information at www.emc2021.org; better yet, sign up on the website to receive symposium news so you don't miss the latest activity. There is no charge to attend the IBIS Summit or any of the Technical Advisory and Standards Committee meetings held during this summer's virtual symposium. If you have questions, please contact Zhiping Yang at zhipingyang@waymo.com. **EMC**
