

30 THE INTERNET OF DISPOSABLE THINGS

Throwaway smart sensors will be made on paper and plastic.

By ALISSA M. FITZGERALD

24 The AI Medical Revolution Starts Here

The promise of artificial intelligence is about to be tested in pathology labs.

By Elie Dolgin

36 Can We Trust Computers With Body-Cam Video?

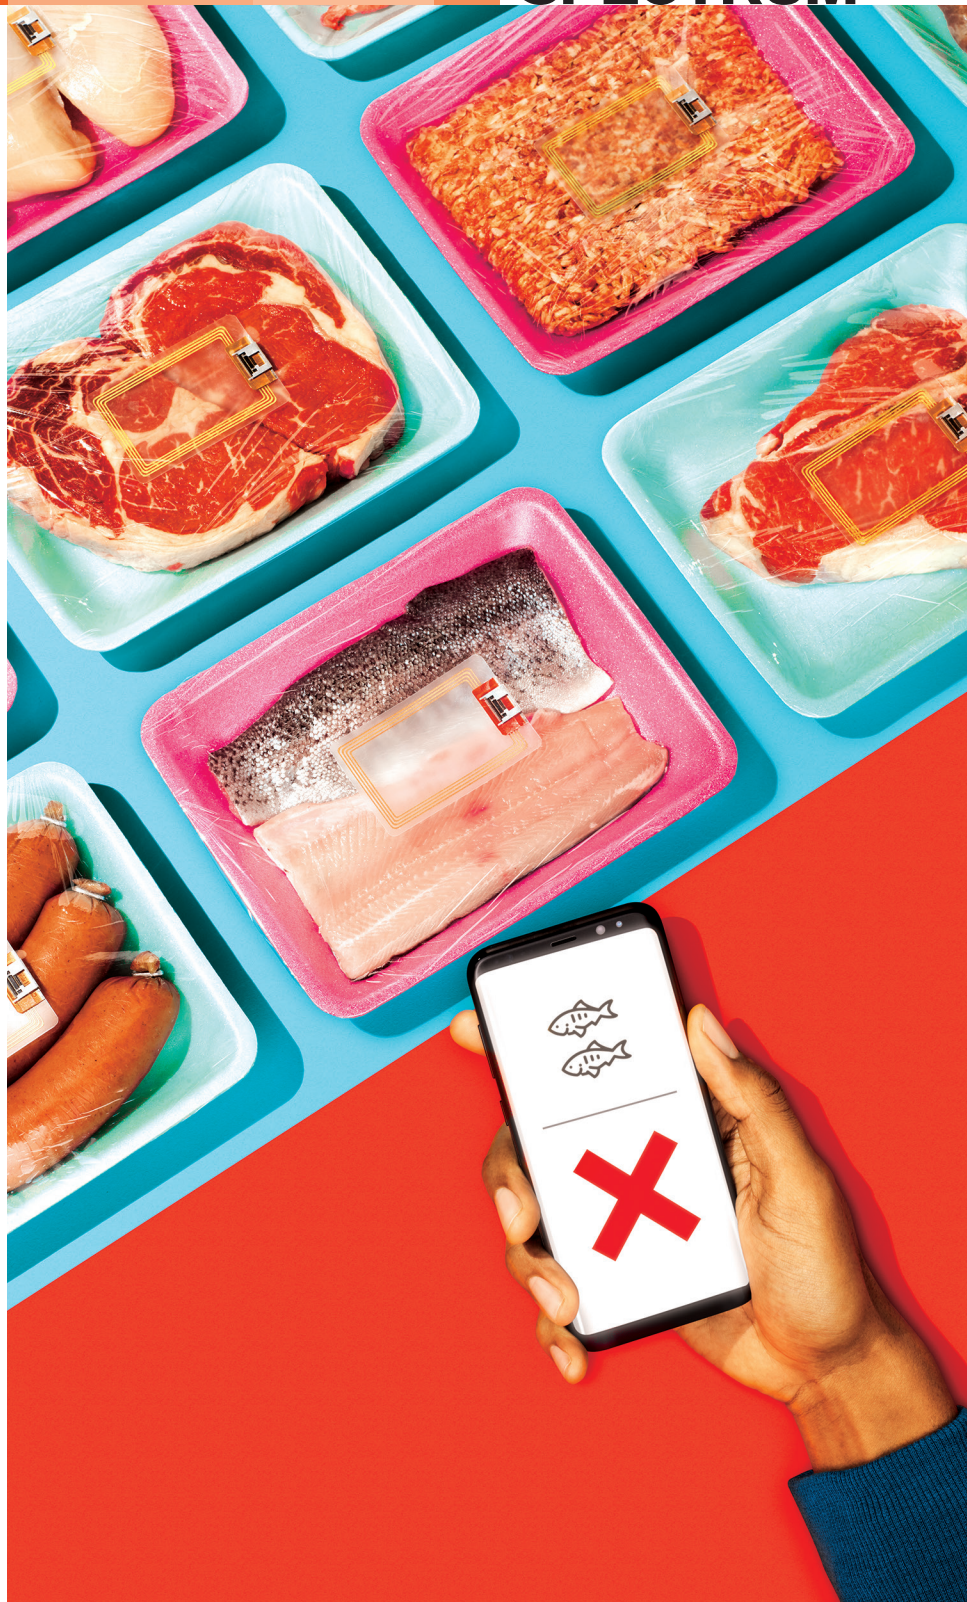

Police hope AI can interpret body-cam video. Good luck with that.

By Daniel Greene & Genevieve Patterson

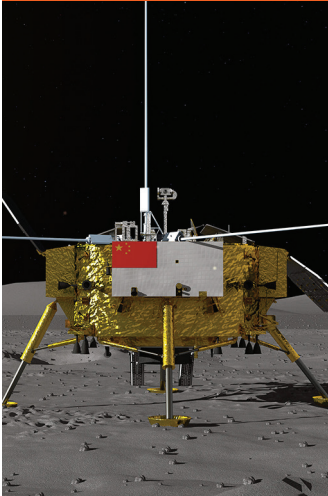

42 To Solve Optimization Problems, Just Add Lasers

A strange system known as an optical Ising machine could speed tricky logistics calculations.

By Peter McMahon

The Consumer Electronics Hall of Fame

IEEE Spectrum honors the electronic marvels that have changed the way we live, in this look at the greatest gadgets of the past 50 years. In this IEEE members-only experience, you can share stories about your favorite gadgets for chances to win prizes and explore an interactive timeline: <https://spectrum.ieee.org/CEHoF/members>

The Institute

Available at theinstitute.ieee.org

- ▶ **STEM TO STEAM** Adding arts to science, technology, engineering, and math education is gaining popularity in schools across the world. Learn why educators are adopting this framework and how students are benefiting.
- ▶ **UPDATING SKILLS FOR GARMENT WORKERS** Learn about the app that Shimmy Technologies developed to help improve the computer literacy of garment workers so they can stay relevant as automation becomes more prevalent in factories. The company won the Retail Digital Transformation Grand Challenge, cosponsored by the IEEE Standards Association.
- ▶ **IEEE MILESTONE** The ring armature for DC dynamos, which smoothed out the severely isolated pulses of electric current, will be honored this month. This technology paved the way for more practical electrical machines for DC to be built.
