MICROWAVE AND WIRELESS COMPONENTS LETTERS®

A PUBLICATION OF THE IEEE MICROWAVE THEORY AND TECHNOLOGY SOCIETY

JULY 2022

VOLUME 32

NUMBER 7

IMWCBJ

(ISSN 1531-1309)

LETTERS

Theory and Numerical Methods

| | | |
|--|--|-----|
| Convolutional Implementation and Analysis of the CFS-PML ABC for the FDTD Method Based on Wave Equation | <i>J.-F. Wang, G. Li, and Z. Chen</i> | 811 |
| Automated Multilayer Neural Network Structure Adaptation Method With l_1 Regularization for Microwave Modeling | <i>W. Na, K. Liu, W. Zhang, F. Feng, H. Xie, and D. Jin</i> | 815 |
| Modal FEM Analysis of Ferrite Resonant Structures | <i>M. Warecka, G. Fotyga, P. Kowalczyk, R. Lech, M. Mrozowski, A. Pacewicz, B. Salski, and J. Krupka</i> | 819 |
| Neural Network With Fourier Series-Based Transfer Functions for Filter Modeling | <i>Z.-X. Liu, W. Shao, X. Ding, L. Peng, and B. Jiang</i> | 823 |
| Automated Diplexer Design With Key Performance Indicator-Based Objectives | <i>Y. Yu, B. Liu, Y. Wang, and Q. S. Cheng</i> | 827 |

Passive Components and Circuits

| | | |
|--|---|-----|
| A Novel End-Wall Waveguide Excitation With Wide Bandwidth and Simple Structure for Millimeter-Wave/Terahertz Application | <i>B. Yuan, P. Wu, Z. Yu, Z. Zhu, and L. Teng</i> | 831 |
| Wideband RWG-SIW Interconnection With Improved Integration for Millimeter-Wave/Terahertz Application | <i>K. Liu, P. Wu, and J. Zhang</i> | 835 |
| Design and Characterization of an All-Metal 3-D Printed Air-Dielectric Coaxial Line | <i>L. Boskovic, J. Cazden, and D. Filipovic</i> | 839 |
| A Novel S-Band High Power Tunable Attenuator With a Magnetron for RF Conditioning of Linac | <i>M. Nikbakht, H. Afarideh, and M. Ghergherehchi</i> | 843 |
| Cascaded Dispersive Delay Structure Based on Periodic Glide Symmetric Microstrip Stubs | <i>L. Liu, J. Huang, G. Q. Luo, and Q. Zhang</i> | 847 |
| A Self-Equalized Linear-Phase Absorptive BPF Using Negative-Group-Delay Admittance Inverters | <i>A. Zhang, J. Xu, and Z. Liu</i> | 851 |

(Contents Continued on Back Cover)

| | |
|---|-----|
| Continuously Tunable 3-D Printed Helical Resonators and Bandpass Filters Using Actuated Liquid Metals | 855 |
| A. Dyussembayev and D. Psychogiou | |
| Peak Power Handling Capability in Groove Gap Waveguide Filters Based on Horizontally Polarized Resonators and Enhancement Solutions | 859 |
| A. Morales-Hernández, M. Á. Sánchez-Soriano, M. Ferrando-Rocher, S. Marini, M. T. Calduch, and V. E. Boria | |
| Filtering T-Type Switch With Flexible Signal Routing Reconfigurability for Crossover-/Adjacent-Channel Applications | 863 |
| W.-L. Zhan, J.-X. Xu, and X. Y. Zhang | |
| <i>Electron Devices and Device Modeling</i> | |
| Stochastic Optimization of the CPL-Function-Based Model for RF Power Transistors | 867 |
| J. Cai, J. B. King, S. Chen, B. You, W. Li, and J. Liu | |
| <i>Hybrid and Monolithic RF Integrated Circuits</i> | |
| A 10-W High-Power Amplifier Using Input Nonlinearity for K-Band Satcom Applications | 871 |
| C. Yi, Y. Lu, Z. Zhao, Y. Wang, J. Zhou, B. Zhao, P. Li, X. Ma, and Y. Hao | |
| Design of a C-Band High-Efficiency Doherty Power Amplifier With Harmonic Control | 875 |
| W. Shi, S. He, W. Shi, C. Shen, C. Li, J. Wu, Z. Xiao, and F. You | |
| A W-Band SPDT Switch With 15-dBm P1dB in 55-nm Bulk CMOS | 879 |
| L. Chen, L. Chen, Z. Ge, Y. Sun, T. Hamilton, and X. Zhu | |
| A 200–250-GHz Phase Shifter Utilizing a Compact and Wideband Differential Quadrature Coupler | 883 |
| R. Ahamed, M. Varonen, D. Parveg, M. Najmussadat, Y. Tawfik, and K. A. I. Halonen | |
| A Novel mm-Wave Analog Phase Shifter Employing Closed-Loop Error-Feedback Self-Tuning I/Q Generation | 887 |
| N. Singhal and S. M. Rezaul Hasan | |
| A 200 GHz Fully Integrated, Polarization-Resolved Quasi-Optical Detector Using Zero-Bias Heterostructure Backward Diodes | 891 |
| Y. Shi, Y. Deng, P. Li, P. Fay, and L. Liu | |
| A 220–261 GHz Frequency Multiplier Chain ($\times 18$) With 8-dBm Peak Output Power in 130-nm SiGe | 895 |
| E. Turkmen, I. K. Aksoyak, W. Debski, W. Winkler, and A. Çağrı Ulusoy | |
| A 225–265 GHz I-Q Receiver in 130-nm SiGe BiCMOS for FMCW Radar Applications | 899 |
| E. Turkmen, I. K. Aksoyak, W. Debski, W. Winkler, and A. Çağrı Ulusoy | |
| A 16-nW-57-dBm Sensitivity Wakeup Receiver Using MEMS-Based Matching Network | 903 |
| J. Tao, N. Wang, Y. Zhu, E. J. Ng, and C.-H. Heng | |
| <i>Measurement Techniques, System Modeling Techniques and Applications</i> | |
| Segmented Statistical Error-Based Adaptive Method for Linearization of Power Amplifiers | 907 |
| J. Wu, S. He, F. You, J. Peng, P. Hao, C. Li, Z. Xiao, Y. Fan, and X. Chen | |
| A Fully-Integrated Ka-Band CMOS Rectifier Using Large Signal Analysis for Wireless Power Transfer | 911 |
| J. Yang, S. Jang, H. S. Park, K. Lee, H. Y. Hong, W. Lee, S. Jo, S. K. Hong, H. Lee, and C. Park | |
| A Compact and High-Efficiency Design of 0.915/2.45 GHz Dual-Band Shunt-Diode Rectifier for Wireless Power Transfer | 915 |
| D.-A. Nguyen and C. Seo | |
| Birdcage Transmitter for Wireless Power Transfer | 919 |
| M. Rajendran, J. E. H. Yang, J. L. Kaibin, L. C. Ping, and S. Y. Huang | |
| Localization With Distributed MIMO Using a High-Speed Sigma-Delta-Over-Fiber Testbed | 923 |
| M. F. Keskin, I. C. Sezgin, H. Bao, H. Wymeersch, and C. Fager | |
| Multi-Angle Recognition of Vehicles Based on Carrier-Free UWB Sensor and Deep Residual Shrinkage Learning | 927 |
| L. Zhu, Y. Sun, and S. Zhang | |
| A Novel Design of a Compact Frequency-Selective Surface With High Selectivity and Angular Stability | 931 |
| X. Zhou, R. Sun, P. Zhao, Y. Cao, B. Yuan, S. Chen, and G. Wang | |
