

ERRATUM

Mineral Oil Based High Permittivity $\text{CaCu}_3\text{Ti}_4\text{O}_{12}$ (CCTO) Nanofluids for Power Transformer Application

IEEE Trans. DEI, Vol.24, No.4, pp. 2344-2353, 2017

R.T. Arun Ram Prasath, Nirmal Kumar Roy, Sankar Narayan Mahato

Department of Electrical Engineering, High Voltage and Insulation Laboratory
National Institute of Technology Durgapur, M G Avenue, West Bengal, India – 713209

and **P. Thomas**

Dielectric Materials Division, Central Power Research Institute,
Bangalore, India- 560080.

The authors would like to make one correction to the above paper,

- (1) The photographs of Mr. R.T. Arun Ram Prasath and Dr. Sankar Narayan Mahato were exchanged in the paper (page no.2352 and page no.2353). The corrected one is given below:

R. T. Arun Ram Prasath was born in Tamilnadu, India. He obtained the B.E (Electrical) degree in Anna University, Tamilnadu. He recently completed M.E. (High voltage Engineering) degree in Anna University, Tamilnadu. He currently, is pursuing the Ph.D. degree research at the National Institute of Technology Durgapur, West Bengal. His areas of interest are power system, high voltage, insulation engineering.

Sankar Narayan Mahato is an Associate Professor in the Department of Electrical Engineering, National Institute of Technology Durgapur, West Bengal, India. He obtained his B.E. (Electrical) degree from the National Institute of Technology Durgapur, M.Tech. (Electrical) degree from the National Institute of Technology Durgapur, the Ph.D. degree from IIT Roorkee. His area of interest includes machines drives, power system and high voltage, insulation engineering.
