In the above article [1], reference 25 was retracted. As the work in this reference is no longer reliable, we are removing it from the reference list. A substitute for the retracted reference is not necessary.

The corresponding discussion in Section I.A must be deleted.

To be more specific, the following discussion in the Subsection A of Section I must be deleted from the article:

Sharma et al. presented a strategy for the automatic leukocyte classification (Kaggle dataset) using pre-trained CNN DenseNet121. With augmentation and transfer learning, a classification accuracy of 98.84% was achieved [25].

The retraction of reference 25 has no impact on the data, analysis, or conclusions of the article.
