

# Corrections to “*De Novo* Annotation of Transposable Elements: Tackling the Fat Genome Issue” [Jamilloux *et al.*, *Proc. IEEE*, vol. 105, no. 3, pp. 474–481, Mar. 2017, DOI: 10.1109/JPROC.2016.2590833]

By VÉRONIQUE JAMILLOUX, JOSQUIN DARON, FRÉDÉRIC CHOLET, AND HADI QUESNEVILLE

In [1], Fig. 1 is inconsistent with the text manuscript. First, the black curve corresponding to case 1 did not correspond to the result from the experiment described in the paper, but to another which was removed from the final manuscript. The second error was a typo with an inversion between the green and blue text indicating NTE50 and LTE50 for cases 4 and 5, respectively. We corrected this figure for the case 1 curve with the right experimental result, and fixed the typo so that it corresponds now perfectly with the manuscript text. Note that this does not affect the text in the manuscript, which remains correct.
