Radar and Communication Antennas
Microwave Assemblies and Components
Laser Devices and Applications
Main office: Great Neck, N. Y. HUNter 2-7876
Antenna Laboratory: Smithtown, N. Y.

Engineers

electrical engineers

Leading international consultants in the field of steam and nuclear power generation have permanent project staff positions available for Electrical Engineers. These openings are caused by planned expansion in line with client needs and anticipated retirements.

We are looking for younger graduate engineers, preferably with two to eight years experience in utility or industrial power work. We also want men who are seeking a long range association offering continuing professional challenge and personal advancement "in the heart of the power generation field."

For those qualified, we offer an excellent starting salary plus a comprehensive fringe benefit program.

For confidential
interview, contact
